

OPEN HOUSE

YOU'RE INVITED!

Join the team from Roundhouse Renewable Energy August 15th, 2018
at the Northside Aztlan Community Center to discuss and comment on
the Roundhouse Renewable Energy Project.

**ROUNDHOUSE
RENEWABLE ENERGY**
ROUNDHOUSE-RENEWABLE.COM

Learn about the proposed Roundhouse Renewable Energy Project.

The project includes a proposed approximately 12-mile transmission line in northern Larimer County and Weld County, Colorado. Power would be generated by a proposed wind farm in Wyoming and the transmission line would connect to the existing Platte River Power Authority Rawhide Energy Station.

Completion of the Roundhouse Renewable Energy project will become a significant step toward achieving renewable energy goals for Platte River Power Authority owner communities, including the Fort Collins Climate Action Plan. **Roundhouse** is working with **landowners, Platte River Power Authority, Larimer County, and Weld County, and City of Fort Collins** and their respective citizen boards throughout this process.

At the meeting, participants can submit written comments on a comment form/fact sheet. Following the open house, participants can provide comments on the proposed routes for the transmission line at the Roundhouse Renewable Energy website roundhouse-renewable.com or by email at info@roundhouse-renewable.com.
